

Measuring your Feet's Length and Determine your DAHU size

To correctly measure your feet, please complete the following steps:

- 1) Put a paper sheet along a wall
- 2) Put your **bare foot** on the sheet, with your heel touching the wall
- 3) Trace a line at the very end of your foot
- 4) Remove the sheet and measure the length between the edge of the sheet and the line you just traced)
- 5) **Repeat 1) to 4) with your other foot**
- 6) Take **the longest measure** and round it to the next 0.5

Remark: If your longest feet is .3 or .4, you can take one size bigger for more comfort

Example: Longest measure = 27.3 cm

DAHU size Precision / Performance = 27.5

DAHU size Comfort / Performance = 28.5
